Managing Director of a Flight Technical consultancy serving small airlines, Low Cost Carriers and corporate operators. Current JAR licence holder on the Boeing 737NG.

Management Experience and Responsibilities

- Aviation Info Tech** Writing OTAR Part 125 compliant operations manuals for Bermudan and Cayman Island registered owners and operators and acting as a Flight Operations Consultant for the Bermuda DCA. . Currently acting as Postholder Flight Operations for a Bahrain based VIP charter carrier having produced almost all their JAR based manuals. Supported a leading UK Low Cost Carrier in the production of their Flight Operations procedures manual and the integration of the SOPs with a schedule carrier they had bought. Wrote: all the EU-OPS operations manuals for a Maltese executive charter AOC operator; most of the flight operations and ground operations manuals for Saudi Arabia's leading Low Cost carrier (LCC) and provided an FAA Despatch Deviations Procedures Manual and Loading and Weight & Balance manual for Saudia Arabia's other LCC. Provided the navigation department for the first year of operation of a Spanish LCC. Undertook a flight operations evaluation of a Mexican LCC. Regularly supported the flight operations department of a UK Inclusive Tour airline. Occasionally supports the flight technical department of easyJet, one of the world's largest LCC. Regularly writes large and small aeroplane FAR and JAR compliant MELs for many operators and owners.
- flyGlobespan** Recruited for the introduction of the long haul fleet (introduction of the 767-300 and 757-200) and expansion of the 737 fleet (introduction of 737-700W and additional -800s) Primary responsibilities were flight technical tasks; secondary responsibilities were the commercial analysis of new routes, aircraft performance and the navigation databases.
- easyJet** Technical Pilot for the 46 aeroplane Boeing 737-300/-700 fleet. Responsibilities included: coordination and communications between the Flight Operations Department and the Engineering Department; overview and amendment of technical manuals particularly the DDPM, FCOMs, QRH and Winter Ops Brief and specialist procedures such as MNPS and P-RNAV; support to the Operations Risks department for incident investigations; the continuing airworthiness flight test program; conducting post maintenance, CAA CofA airworthiness and handback test flights; accepting and delivering new aeroplanes from Seattle; the overview and investigation of ASRs/MORs; the overview of CAA, FAA, JAA, Boeing and DoT documents that affect the Flight Policy & Standards department; membership of various project teams such as the electronic flight bag and integrated electronic operations manuals.
- Go Fly** Member of the Flight Operations senior management team. Responsible for: flight technical standards of all pilots; the provision of aircraft performance data; fuel and flight planning equipment and the navigation database; the standard and content of the company Operations Manual; flight deck documents and checklists; liaison with the Engineering, Commercial, Customer Services, Flight Safety and Quality departments; the introduction of new aircraft; CAA and customer acceptance test flights; guiding and managing project pilots; the analysis of aircraft fuel consumption; Chairman of recruiting boards; disciplinary, accident and incident investigations.
