

IBAC Technical Report Summary

-

Subject: Development of SARPs for GNSS Augmentation

Meeting: GBAS & SBAS Working Groups, Canberra, 17-28 Jan 2000

IBAC File: 9. ICAO Panels 13.1 GNSS

Reported by: Capt. Heinz Lichius, IBAC Liaison Officer

Summary:

The GBAS (Ground Based Augmentation) and SBAS (Space Based Augmentation Working Groups concentrated on the preparation and harmonization of the future SARPs for the ICAO GNSS

Details are contained in a companion report.

Implication for Business Aviation:

There will be no direct or imminent implication for business aircraft flight operations. All pending decisions will mostly touch the manufacturers of the electronic equipment; Raytheon, Rockwell- Collins etc.
